Symposium 2020

Expectations and innovations accelerate the development in the areas of Automotive Functional Safety and Cybersecurity. This leads to a lot of interesting future topics and questions to be solved.

Join our Symposium in October 2020 and learn more about e.g.:

- Probabilistic Techniques for the Evaluation of Systematic Safety Integrity
- The importance of Mathematical Models in Systems incorporating Artificial Intelligence
- Architectures for Deep Neural Networks and related challenges
- Automotive Cybersecurity – UNECE WP.29 regulations, ISO/SAE 21434 and technical challenges
- Verification processes per ISO 26262 and per ASPICE, how to transform the falsest of the friends in good allies
- SOTIF - ISO 21448, Update regarding to the latest developments of this upcoming standard
- and much more!

Meet our team of experts and discuss the future challenges in Automotive Functional Safety and Cybersecurity.

When: October 29 - 30, 2020

Where: Arabella Alpenhotel
am Spitzingsee
Seeweg 7
83727 Schliersee-Spitzingsee
Germany
